

GroundTruthComparator
::GroundTruthComparator

RadarComparator::RadarComparator

ConfigProvider::getComparisonPath

```
graph LR; A[GroundTruthComparator::GroundTruthComparator] --> C[ConfigProvider::getComparisonPath]; B[RadarComparator::RadarComparator] --> C;
```

The diagram illustrates a dependency or relationship between two classes and a method. On the left, there are two class boxes: 'GroundTruthComparator::GroundTruthComparator' (top) and 'RadarComparator::RadarComparator' (bottom). On the right, there is a method box labeled 'ConfigProvider::getComparisonPath'. Two blue arrows point from the right side of each class box to the left side of the method box, indicating that both classes utilize or depend on this specific method.
